Comments:
Good morning.

No doubt you are up to your elbows with the recent spill into the Animas River, etc. As the Manager of Hazardous Materials/Waste worker training here at the University of Utah, I want to offer our services in meeting the safety and health training needs to you and your contractor teams. We are capable of mobilizing into the area and setting up training to meet the training requirements under the Hazwoper standard found in 29 CFR 1910.120.

Please feel free to contact me at either number below for additional information regarding this support.
